

Members: Alex Rea, Emma Capirchio, Gabriel Carillo

This week was mostly team based, as we needed to work together to come up with ideas and work together on designing the wireframe.

This week I worked on:

- (1) Implemented wireframe into Figma for prototype
- (2) Brainstorm database design for next week implementation
- (3) Planned out our color scheme for project

In the upcoming week I plan to:

- (1) Create database ERD for project
- (2) Make adjustments or edits to prototype as needed
- (3) Contact Scott/Doug for MySQL Database creation for project

Impediments/roadblocks

- (1) Agreeing on color scheme and project layout
